# 1. Getting Started & Login

---

Download the PayLock Pro Admin app from Expo or install the APK provided by your administrator. The app is available for Android devices running Android 8.0 or later.

## First-Time Setup

1. Install the PayLock Pro Admin APK on your Android device.
2. Open the app - you will see the login screen.
3. Enter your username and password provided by your Super Admin.
4. Tap 'Login' to access your dashboard.
5. If you are the first user, your account is automatically a Super Admin with full access.

## Staying Signed In

Toggle 'Stay signed in' on the login screen to remain logged in between app restarts. Your session token is stored securely on the device.

*Note: Passwords must be at least 6 characters. Contact your Super Admin if you forget your credentials. Sessions can be revoked remotely from the Settings page.*

*Tip: Enable push notifications during setup to receive real-time alerts for payments, client activities, and security events.*

## 2. Dashboard Overview

The dashboard is your command center, displaying real-time metrics for your entire loan portfolio at a glance.

Admin Dashboard - Real-time portfolio overview

### Key Metrics

| Metric              | Description                    | Action on Tap          |
|---------------------|--------------------------------|------------------------|
| Total Clients       | Number of registered clients   | Opens client list      |
| Active Loans        | Currently active loan count    | Opens loan overview    |
| Monthly Collections | Total collected this month     | Opens payment history  |
| Collection Rate     | % of payments received on time | Opens analytics        |
| Interest Earned     | Total interest this month      | Opens financial report |
| Overdue Amount      | Total overdue across clients   | Opens overdue clients  |

### Quick Actions

- Add Client - Create a new client record
- Record Payment - Quick payment entry
- Lock/Unlock Device - Immediate device control
- Send Reminder - Push notification to clients

The dashboard auto-refreshes every 30 seconds. Pull down to manually refresh.

1. Navigate to the Clients tab in the bottom navigation.
2. Tap the '+' button in the top right corner.
3. Fill in required client details: full name, phone number.
4. Optionally add: email address, physical address, ID number.
5. Set the initial device token if provisioning a device.
6. Tap 'Save' to create the client record.

- Contact information and identification details
- Device status (online/offline, locked/unlocked, last seen)
- Active loans with payment schedules and history
- GPS location history with map view (Professional+ plan)
- Document vault with uploaded files
- Credit score and risk assessment (Enterprise plan)
- In-app messaging and communication log
- Tamper detection alerts and security events

## Searching & Filtering

Use the search bar at the top of the client list to find clients by name, phone number, or email. The list updates in real-time as you type.

## Client Provisioning Methods

Register client devices using one of these methods:

- Manual Code: Client enters a 6-digit registration code in the Client app
- QR Code: Admin generates a QR code, client scans it (Enterprise)
- NFC Tap: Touch devices together for instant enrollment (Enterprise)

## Bulk Import (Enterprise)

Enterprise users can import clients from CSV files. Go to Features > Bulk Import and upload a CSV with columns: name, phone, email, address. The system validates data before import and reports any errors.

## 4. Loan Management

---

### Creating a Loan

1. Open a client's profile from the Clients tab.
2. Tap 'New Loan' or the '+' button in the loans section.
3. Select a pre-configured loan plan OR enter custom terms.
4. Set the principal amount (loan size).
5. Choose interest rate and calculation method (flat or day-count).
6. Set loan duration and payment frequency (weekly, bi-weekly, monthly).
7. Review the auto-generated EMI payment schedule.
8. Tap 'Create Loan' to finalize.

### Interest Calculation Methods

PayLock Pro supports two interest calculation methods:

- Flat Rate: Interest calculated on the full principal for the entire duration. Simple and predictable.
- Day-Count (Reducing Balance): Interest calculated on the outstanding balance. More fair for early repayments.

### Loan Plans (Professional+)

Pre-configure loan templates under Features > Loan Plans. Each plan defines:

- Default interest rate and calculation method
- Standard duration and payment frequency
- Late fee rules and grace periods
- Auto-lock behavior settings

### Loan Restructuring (Professional+)

For overdue or troubled loans, use the restructure option:

1. Open the client's loan details.
2. Tap 'Restructure Loan'.
3. Modify terms: extend duration, adjust interest, change payment amount.
4. Review the new payment schedule.
5. Confirm restructuring. A new schedule is generated automatically.

*Note: Restructured loans are tracked separately in analytics for portfolio health monitoring.*

## 5. Payment Tracking & Late Fees

---

### Recording a Payment

1. Navigate to the Payments tab or open a client's loan details.
2. Tap 'Record Payment'.
3. Enter the payment amount received.
4. Select the payment method (cash, bank transfer, mobile money, Stripe).
5. Add optional notes or reference number.
6. Tap 'Confirm' to record the payment.

The system automatically updates the loan balance, calculates remaining EMIs, and adjusts the device lock status if applicable.

### Payment Reminders

Automated reminders are sent before each payment due date:

- Push notification: 3 days before due date
- Email reminder: 1 day before due date (if email configured)
- SMS reminder: On due date (add-on feature)
- Custom reminder schedules in Features > Payment Reminders

### Late Fee Configuration

Configure late fees in Settings > Late Fee & Auto-lock:

- Late Fee Percentage: Applied as a % of the monthly payment amount
- Grace Period: Days after due date before fees apply (default: 3 days)
- Auto-Lock: Automatically lock device when payment is overdue past grace period
- Apply to All: Push settings to all existing clients at once

**WARNING: Late fees compound if multiple payments are missed. Ensure clients are aware of fee structures.**

### Stripe Integration (Enterprise)

Enterprise users can accept online payments via Stripe. Clients receive a payment link and can pay directly with a credit/debit card. Payments are automatically reconciled.

## 6. Device Lock & Unlock

The core feature of PayLock Pro - remotely lock client devices when payments are overdue.

### Manual Lock

1. Open the client's profile.
2. Tap the 'Lock Device' button.
3. Enter a custom lock message (displayed on the client's screen).
4. Choose lock mode: Standard or Device Owner (Enterprise).
5. Confirm the lock action.

The client's device will immediately display a full-screen lock message. The client can only make emergency calls (112/911).

### Manual Unlock

1. Open the locked client's profile.
2. Tap 'Unlock Device'.
3. The device unlocks immediately - client regains full access.

### Auto-Lock Rules

Configure automatic locking in Settings or per-client:

- Grace Period: Days after missed payment before auto-lock triggers
- Auto-Lock Enabled: Toggle per client or globally
- Lock Escalation: Standard lock -> Device Owner lock (if applicable)

### Device Lock Modes

| Mode         | Capabilities                                          | Requirement             |
|--------------|-------------------------------------------------------|-------------------------|
| Standard     | Lock screen, notification block, kiosk                | Device Admin permission |
| Device Owner | Full control, app whitelist, factory reset protection | ADB/QR provisioning     |

*Note: Device Owner mode provides the strongest protection and is recommended for high-value loans.*

## 7. Reports & Analytics

Reports - Financial analytics and data export

Access comprehensive reports from Features > Reports.

### Available Reports

- Financial Summary: Revenue, principal disbursed, interest earned, profit/loss
- Collection Trends: Payment rates over time with trend charts
- Client Health Scores: Risk distribution across your portfolio
- Monthly Interest Breakdown: Interest earned per client and loan
- Overdue Analysis: Days overdue distribution, recovery rates
- Collection Trends (Professional+): Detailed trend analysis with forecasting
- Revenue Forecasting (Enterprise): AI-predicted future collections
- Portfolio Health / NPA (Enterprise): Non-performing asset tracking
- Risk Score Distribution (Enterprise): Credit risk analytics
- Comparative Analytics (Enterprise): Period-over-period comparisons

### Export Options

All reports can be exported in two formats:

- PDF: Formatted report with charts, suitable for sharing and printing
- CSV: Raw data export for custom analysis in Excel or other tools

### Scheduled Reports (Enterprise)

Enterprise users can schedule automated email reports:

- Daily digest: Summary of previous day's activity
- Weekly report: Comprehensive weekly analytics
- Monthly report: Full monthly financial summary

## 8. Document Vault (Enterprise)

---

Securely store client documents in the encrypted vault. Access it from a client's profile > Documents tab.

### Uploading Documents

1. Open a client's profile.
2. Navigate to the Documents tab.
3. Tap 'Upload' and select a file from your device (max 10MB).
4. Choose the document type: ID photo, contract, proof of income, bank statement, or other.
5. Add a description for easy identification.
6. Tap 'Upload' - the file is encrypted and stored securely.

### Supported File Types

- Images: JPG, PNG, HEIF
- Documents: PDF
- Maximum file size: 10MB per file

### Bank Statement OCR (Enterprise)

Enterprise users can upload bank statements and use AI-powered OCR to automatically extract:

- Transaction history and patterns
- Income verification
- Balance trends
- Expense categorization

*Note: Documents are stored on the server with encryption at rest. Only authorized admins can view client documents.*

## 9. Settings & User Management

Settings - Account and team management

### Your Account

Manage your personal account from Settings:

- Edit Profile: Update your name, email, phone, and address
- Change Password: Update your login credentials (min 6 characters)
- Current Plan: View your subscription tier and features

### User Management

Manage your team from Settings > User Management. The system enforces strict role-based access:

| Role        | Can Create     | Can Manage        | Sees             |
|-------------|----------------|-------------------|------------------|
| Super Admin | Admins + Users | Everyone          | All team members |
| Admin       | Users only     | Own created users | Self + own users |
| Viewer      | Nobody         | Nobody            | Self only        |
| Collections | Nobody         | Nobody            | Self only        |

### Creating a New User

1. Go to Settings > User Management.
2. Tap the '+' button.
3. Fill in: First Name, Last Name, Username, Password.

4. Select role: User (default) or Admin (Super Admin only).
5. Tap 'Add' to create the account.

## Changing a User's Plan

1. Find the user in the User Management list.
2. Tap the plan icon (tag icon) next to their name.
3. Select the new plan: Starter, Professional, or Enterprise.
4. The change takes effect immediately.

**WARNING: Admins can only manage users they created. Super Admins can manage everyone.**

## Active Sessions (Enterprise)

Monitor and revoke active login sessions from Settings > Active Sessions. Each session shows login time, IP address, and device info. Revoke suspicious sessions immediately.

## 10. Team Management & Permissions

---

PayLock Pro uses a hierarchical permission system to ensure data security and proper access control.

### Role Hierarchy

Permissions flow downward - each role includes all permissions of lower roles:

1. Super Admin: Full system access. Can create/delete admins. Manages all users and plans. Access to audit logs, diagnostics, and all enterprise features.
2. Full Admin: Can create users (not admins). Manages only users they created. Access to most features based on subscription plan.
3. Collections: Can view clients and loans, record payments, send reminders. Cannot modify settings or manage team.
4. Viewer: Read-only access to client data and reports. Cannot make any changes.

### Enterprise Team Features

- Unlimited team members (Enterprise plan)
- Role-based permissions with granular control
- Audit log tracking all user actions
- Session management with remote revocation

## 11. Subscription Plans & Feature Tiers

---

PayLock Pro offers three subscription tiers designed for different business sizes:

### Starter (\$29/month)

- Up to 25 clients
- Push notifications
- Basic analytics dashboard
- Email reminders
- Loan calculator
- 1 admin user

### Professional (\$79/month)

- Up to 200 clients
- Everything in Starter +
- Device lock & unlock
- Client messaging (Telegram, WhatsApp)
- PDF contract generation
- Automated payment scheduling
- Auto-lock after grace period
- Late fee automation
- Team management (3 members)
- GPS location tracking
- Advanced reports (PDF & CSV)
- Loan plans & restructuring
- Collection trends analysis

### Enterprise (\$199/month)

- Unlimited clients & team members
- Everything in Professional +
- QR & NFC provisioning
- Device Owner mode (full device control)
- Bank statement OCR (AI-powered)
- Document vault with encryption
- Stripe payment integration
- Scheduled email reports
- Portfolio health & NPA tracking
- Risk score tracking & credit scoring
- Daily digest email
- Session management
- Role-based permissions & audit log
- Comparative analytics & revenue forecasting

- Bulk import/export
- Full REST API access
- Priority support with SLA

## Custom Plan

For large organizations with specific needs, contact [sales@paylock.pro](mailto:sales@paylock.pro) for a tailored plan with custom pricing, dedicated support, and white-label options.

## 12. Advanced Features (Enterprise)

---

### Device Owner Mode

The most powerful device control mode. Requires ADB provisioning or factory reset with QR code. Enables:

- Factory reset protection - device cannot be reset without admin approval
- App whitelisting - only approved apps can run
- Custom launcher - PayLock becomes the default home screen
- Kiosk mode - device is restricted to a single app
- SIM lock - prevents SIM card changes

### Credit Scoring

AI-powered credit scoring based on payment history, device usage patterns, and financial data. Scores update automatically and are visible in client profiles.

### REST API Access

Full programmatic access to all PayLock features:

- Base URL: <https://api.paylock.pro/api/>
- Authentication: Token-based (via `/api/admin/login`)
- Full CRUD for clients, loans, and payments
- Device control endpoints
- Rate limit: 1000 requests/minute
- API docs: <https://api.paylock.pro/api/docs>

## 13. Security & Tamper Detection

---

PayLock Pro includes multiple layers of security to prevent tampering with the client app.

### Permission Monitoring

The client app monitors all 8 critical permissions. If any permission is revoked via device settings:

1. First detection: Full-screen Security Alert + push notification warning
2. Second detection (permission still revoked): Tamper reported to server + device data wipe initiated

**WARNING: Data wipe is irreversible. Ensure clients understand the consequences of tampering with app permissions.**

### Admin Mode Protection

If Device Admin mode is deactivated:

1. Immediate Security Alert dialog appears
2. Push notification sent
3. If not re-enabled: tamper reported + factory reset

### Additional Security Measures

- Screenshot blocking: Client app prevents screen capture
- Reboot detection: App re-locks device after reboot if payment is overdue
- Offline enforcement: Lock state persists even without internet
- Clear data protection: Client ID backed up externally, restored on data clear
- Foreground monitoring: Detects attempts to switch away from lock screen
- Status bar blocking: Prevents notification shade from being pulled down when locked

## 14. Troubleshooting & FAQ

---

### Cannot Login

- Verify username and password are correct (case-sensitive).
- Check internet connection.
- If locked out, contact your Super Admin to reset your password.
- Check if your session was revoked in Active Sessions.

### Device Not Responding to Lock/Unlock

- Verify the client device has PayLock Client app installed.
- Check that the device has internet connectivity.
- Ensure all 8 permissions are granted on the client device.
- Check device admin is active on the client device.
- Try sending a push notification to verify connectivity.
- If using Device Owner mode, verify ADB provisioning was completed.

### Payments Not Syncing

- Pull down to refresh the dashboard.
- Check your internet connection.
- Verify the payment was recorded correctly.
- Check the audit log for any errors.

### Contact Support

Email: [support@paylock.pro](mailto:support@paylock.pro)

Website: <https://paylock.pro/contact>

Response times:

- Starter: Within 48 hours
- Professional: Within 24 hours
- Enterprise: Within 4 hours (SLA)
