10. FAQ & Troubleshooting

1. Introduction

The PayLock Pro Client app is installed on your device as part of a loan agreement with your lender. This manual explains how the app works, what permissions it needs, and what happens during the loan period.

What the App Does

- Displays your loan status and payment information
- Sends payment reminders before due dates
- Allows your lender to manage device access based on payment status
- Tracks device location for compliance purposes
- Enables secure communication with your lender

What the App Does NOT Do

- Does not access your personal files, photos, or messages
- Does not record audio or video
- Does not share your data with third parties
- Does not charge you any fees

Note: The app requires certain permissions to function properly. These permissions are part of your loan agreement and cannot be changed while the loan is active.

2. Installation & Setup

Your lender will provide you with the app installation in one of these ways:

Installation Methods

- Direct APK: Your lender sends you a download link. Tap to install.
- QR Code Scan: Your lender shows you a QR code. Scan it with your camera to begin setup.
- NFC Tap: Touch your device to your lender's device for instant enrollment.

System Requirements

- Android 8.0 (Oreo) or later
- Active internet connection (WiFi or mobile data)
- At least 100MB free storage space

WARNING: Do not uninstall or disable the app without your lender's permission. Tampering with the app may result in data loss.

3. Registration Process

1. Open the app after installation.
2. You will see the registration screen.
3. Enter the activation code provided by your lender.
4. Your name and loan details will appear for confirmation.
5. Tap 'Register' to complete activation.
6. The app will guide you through permission setup.

Note: Keep your activation code safe. You may need it if you reset your device.

4. Granting Permissions

Permission Setup - Grant all 8 required permissions

After registration, the app requires 8 permissions for proper operation. Each permission card on the screen shows its status (green = granted, red = not granted).

Permission Details

Permission	Why It's Needed	How to Grant
Battery	Keeps app running in background	Tap card > Allow unrestricted
Overlay	Shows lock screen & reminders	Tap card > Toggle ON
Auto Start	Restarts app after device reboot	Tap card > Follow instructions
Accessibility	Enables device management	Tap card > Enable service
Location	Compliance monitoring	Tap card > Allow Always
Notification	Receives payment reminders	Tap card > Allow
Usage Stats	Security monitoring	Tap card > Toggle ON
Notif. Listener	Ensures alerts aren't dismissed	Tap card > Enable

Device Admin Activation

After all 8 permissions are granted, the app will ask you to activate Device Admin mode. This is the final step:

1. A dialog appears asking to enable Device Admin.
2. Tap 'Yes, Enable' to activate.
3. The app confirms activation with a green checkmark.

4. Setup is complete - the app runs in the background.

WARNING: Once permissions are locked by your lender, attempting to disable them from device settings will trigger a security alert. If permissions remain disabled, your device data will be wiped.

5. Understanding the Home Screen

After setup is complete, the home screen shows your current status:

Status Indicators

- Welcome Message: Your name and account status
- Protection Status: Green shield = fully protected, Yellow = permissions missing
- Device Status: Shows if your device is currently locked or unlocked
- Loan Information: Next payment date, amount due, total remaining
- Warning Messages: Important notices from your lender (auto-dismiss after 10 seconds)

Pull to Refresh

Swipe down on the home screen to manually refresh your status. The app also auto-refreshes every 5 seconds.

Language Selection

Change the app language using the language picker in the top right corner. Available languages: English, Estonian, Russian.

6. Payment Information

The home screen displays your loan status:

- Loan Amount: Total loan principal
- Outstanding Balance: Remaining amount to pay
- Monthly EMI: Your regular payment amount
- Next Due Date: When your next payment is expected

Make payments directly to your lender using their specified method (cash, bank transfer, mobile money). Once your lender records the payment, your status updates automatically within minutes.

Tip: Pay on time to avoid device locking and late fees. Set a personal reminder for 2-3 days before your due date.

7. Device Lock & What to Expect

Lock Screen - Displayed when payment is overdue

If a payment is overdue past the grace period, your lender may lock your device. Here's what happens:

When Your Device is Locked

- A full-screen lock message appears - you cannot use other apps
- Your lender's custom message explains the reason
- Pending payment amount and due date are displayed
- Status bar and navigation are blocked
- You CAN still make emergency calls (112/911) via the button at the bottom

How to Unlock

1. Contact your lender to arrange payment.
2. Make the required payment.
3. Your lender confirms payment receipt in their system.
4. Your device unlocks automatically within minutes.

Temporary Unlock

In some cases, your lender may grant a temporary unlock while payment is being processed. Contact your lender to request this.

WARNING: Do not try to force-restart your device to bypass the lock. The lock persists across reboots and even works offline.

8. In-App Messaging

If your lender has enabled messaging, you can communicate directly through the app:

1. Tap the chat icon on the home screen.
2. Type your message in the text field.
3. Tap 'Send' to deliver the message.
4. Your lender will see the message and can respond.

Messages are stored on the server and synchronized across sessions. Your lender may also communicate via Telegram or WhatsApp if configured.

9. Security & Protection

The app includes several security features to ensure the loan agreement is maintained:

Permission Monitoring

The app monitors all granted permissions. If you navigate to device settings and disable any permission:

1. A full-screen Security Alert dialog appears immediately.
2. A push notification is sent as a warning.
3. You should re-enable the permission immediately.
4. If the permission remains disabled, a data wipe will be triggered.

What Triggers Security Alerts

- Disabling any of the 8 required permissions
- Deactivating Device Admin mode
- Attempting to uninstall the app (when blocked)
- Clearing app data or cache
- Factory resetting the device (Device Owner mode prevents this)

WARNING: Tampering with the app or its permissions will result in a security response including potential data wipe. Always contact your lender before making any changes.

10. FAQ & Troubleshooting

Can I uninstall the app?

The app can only be uninstalled with your lender's permission. Contact your lender to discuss uninstallation after your loan is fully repaid.

My device is locked but I made a payment

Contact your lender to confirm payment receipt. Once confirmed, your device will be unlocked within minutes automatically.

The app is draining my battery

The app is optimized for minimal battery usage (less than 2% per day). If you experience issues, ensure battery optimization exemption is granted (this is one of the 8 permissions). Do not force-stop the app as it needs to run in background.

I'm not receiving notifications

Check that notification permissions are granted in both the app and device settings. Ensure the app is not being killed by your device's battery saver. Some Chinese manufacturers (Huawei, Xiaomi, Oppo) have aggressive battery management - follow the Auto Start permission instructions.

I changed phones

Contact your lender. They will need to:

1. Remove the old device from your account.
2. Provide a new activation code for your new phone.
3. Help you set up the app on the new device.

The app crashed

If the app crashes, it will restart automatically. If it keeps crashing:

- Restart your device
- Check for app updates from your lender
- Contact your lender for a replacement APK if needed

Contact Support

For technical issues: support@paylock.pro

For payment issues: Contact your lender directly

When reporting issues, please provide: your name, lender name, device model, and a description of the problem.
