12. FAQ & Troubleshooting

1. Introduction

The PayLock Pro Client app is installed on your device as part of a loan agreement. This manual explains how the app works, what permissions it needs, and what happens during the loan period.

What the App Does

- Displays your loan status and payment schedule
- Sends payment reminders before due dates
- Allows your lender to manage device access based on payment status
- Tracks device location for compliance purposes
- Enables secure communication with your lender

What the App Does NOT Do

- Does NOT access your personal files, photos, or messages
- Does NOT record audio or video
- Does NOT share data with third parties
- Does NOT charge you any fees

Note: The app requires certain permissions to function. These are part of your loan agreement and cannot be changed while the loan is active.

2. Installation & Setup

Installation Methods

- Direct APK: Your lender sends you a download link. Tap to install.
- QR Code Scan: Your lender shows a QR code. Scan with camera to begin setup.
- NFC Tap: Touch your device to lender's device for instant enrollment.

System Requirements

- Android 8.0 (Oreo) or later
- Active internet connection (WiFi or mobile data)
- At least 100MB free storage

Step-by-Step Installation

1. Receive the APK file or link from your lender.
2. If prompted, enable 'Install from unknown sources' in Android settings.
3. Tap the APK file to begin installation.
4. Tap 'Install' when prompted by the system.
5. Wait for installation to complete (usually 30-60 seconds).
6. Tap 'Open' to launch the app.

WARNING: Do not uninstall or disable the app without your lender's permission. Tampering may result in data loss.

3. Registration Process

After installation, you need to register your device with your lender's system.

1. Open the PayLock Pro Client app.
2. The registration screen appears with a code entry field.
3. Enter the activation code provided by your lender (usually 6-8 characters).
4. Your name and loan details appear for confirmation.
5. Review the information carefully - ensure your name is correct.
6. Tap 'Register' to complete device activation.
7. The app transitions to the permission setup screen.

Note: Keep your activation code safe. You may need it if you reset your device or switch to a new phone.

Tip: If registration fails, check your internet connection and verify the activation code with your lender.

4. Granting Permissions

The app requires 8 permissions for proper operation. After registration, you'll see a permission setup screen with 8 cards arranged in a 2-column grid. Each card shows a green checkmark (granted) or red X (not granted).

The 8 Required Permissions

#	Permission	Why Needed	How to Grant
1	Battery	Keeps app running	Tap > Allow unrestricted
2	Overlay	Shows lock screen	Tap > Toggle ON
3	Auto Start	Restarts after reboot	Tap > Follow instructions
4	Accessibility	Device management	Tap > Enable service
5	Location	Compliance tracking	Tap > Allow Always
6	Notification	Payment reminders	Tap > Allow
7	Usage Stats	Security monitoring	Tap > Toggle ON
8	Notif. Listener	Ensures alerts work	Tap > Enable

Device Admin Activation

After all 8 permissions are granted, the app asks to activate Device Admin mode:

1. A dialog appears: 'Enable Device Admin?'
2. Read the explanation of what Device Admin allows.
3. Tap 'Yes, Enable' to activate.
4. Green checkmark confirms activation.
5. Setup is complete - the app runs in the background.

WARNING: Once permissions are locked by your lender, disabling them from device settings will trigger a security alert. If permissions remain disabled, your device data will be wiped.

5. Understanding the Home Screen

After setup, the home screen shows your current status with several information sections.

Status Elements

- Welcome Message: Your name and account status at the top
- Protection Status: Green shield = fully protected | Yellow = permissions missing
- Device Status: Shows if device is locked or unlocked
- Permission Cards: 8 cards showing each permission status (green/red)
- Device Admin Toggle: Shows admin mode status (active/inactive)
- Warning Banner: Important notices from lender (auto-dismiss after 10 seconds)

Refreshing Your Status

The app auto-refreshes every 5 seconds. You can also swipe down to manually refresh and get the latest status from the server.

Language Selection

Change the app language using the picker in the top right corner. Available: English, Estonian (Eesti), Russian.

6. Payment Information

Your loan details are displayed on the home screen when available:

- Loan Amount: Total principal borrowed
- Outstanding Balance: Remaining amount to pay
- Monthly EMI: Your regular payment amount
- Next Due Date: When your next payment is expected
- Interest Rate: Annual percentage rate on your loan
- Payment History: List of all recorded payments

Make payments directly to your lender using their specified method (cash, bank transfer, mobile money). Once your lender records the payment, your status updates automatically within minutes.

Tip: Pay on time to avoid device locking and late fees. Set a personal reminder 2-3 days before your due date.

Understanding Late Fees

If payment is not received by the due date:

1. Grace period begins (typically 3 days) - no fees yet.
2. After grace period: late fee is applied (% of monthly payment).
3. If still unpaid: device may be automatically locked.
4. Late fees compound with each missed payment.

7. Device Lock & What to Expect

If a payment is overdue past the grace period, your lender may lock your device.

When Your Device is Locked

- A full-screen lock message appears with a dark red/black background
- Large lock icon and 'Device Locked' text displayed prominently
- Custom message from your lender explains the reason
- Pending payment amount and due date are shown
- Status bar and navigation are completely blocked
- You CANNOT use other apps, make calls (except emergency), or access settings
- Emergency call button (112/911) is available at the bottom of the screen

How to Get Unlocked

1. Contact your lender to arrange payment (use another phone if needed).
2. Make the required payment through agreed method.
3. Your lender confirms payment in their system.
4. Device unlocks automatically within minutes.
5. You regain full access to all apps and functions.

What WON'T Work to Bypass the Lock

- Restarting the device - lock persists across reboots
- Clearing app data - protection is backed up externally
- Turning off internet - lock works offline
- Force stopping the app - it auto-restarts
- Pulling down notification shade - blocked when locked

WARNING: Do NOT attempt to factory reset your device. If Device Owner mode is active, factory reset is blocked. If somehow successful, your device data will be permanently lost.

8. In-App Messaging

If your lender has enabled messaging, you can communicate directly through the app.

1. Tap the chat/message icon on the home screen.
2. Type your message in the text field at the bottom.
3. Tap 'Send' to deliver.
4. Your lender sees the message and can respond.
5. Messages sync across sessions and are stored on the server.

Your lender may also contact you via Telegram or WhatsApp if those integrations are configured.

Tip: Use messaging to request payment extensions, report issues, or ask questions about your loan.

9. Security & Protection

The app includes security features to maintain the loan agreement.

What Happens If You Disable Permissions

If you go to your phone's Settings and disable any of the 8 required permissions:

1. The app detects the change when you return to the app.
2. A full-screen Security Alert dialog appears immediately.
3. A push notification is sent as a warning.
4. You must re-enable the permission in device Settings immediately.
5. If the permission remains disabled on the next app check: the app reports tampering to the server and initiates a DATA WIPE of the device.

What Triggers Security Responses

- Disabling ANY of the 8 required permissions from device settings
- Deactivating Device Admin mode
- Attempting to uninstall the app (when uninstall is blocked)
- Clearing app data or cache
- Factory resetting (Device Owner mode prevents this)

WARNING: TAMPERING WITH THE APP OR ITS PERMISSIONS WILL RESULT IN A DATA WIPE. This means ALL data on your device will be permanently erased. Always contact your lender before making any changes to app permissions.

10. Emergency Features

Emergency Calls

Even when your device is locked, you can always make emergency calls:

- Tap the 'Emergency Call' button at the bottom of the lock screen.
- This dials your local emergency number (112 in Europe, 911 in US).
- Emergency calls are NEVER blocked by the app.

SOS Contact

If you're in a situation where you need help, the emergency call feature is always accessible regardless of lock or payment status.

11. Language & Accessibility

The app supports multiple languages to ensure accessibility:

- English: Full interface in English
- Eesti (Estonian): Complete Estonian translation
- Russian: Full Russian translation

To change language: tap the language picker icon (flag/globe) in the top right corner of the home screen. The entire interface updates immediately.

12. FAQ & Troubleshooting

Can I uninstall the app?

Only with your lender's permission after your loan is fully repaid.

My device is locked but I made a payment

Contact your lender to confirm receipt. Unlock happens automatically within minutes after confirmation.

The app is draining my battery

The app uses less than 2% battery per day. Ensure battery optimization exemption is granted (Permission #1). Do not force-stop the app.

I'm not receiving notifications

Check notification permissions in both app and device settings. Some manufacturers (Huawei, Xiaomi, Oppo) have aggressive battery management - follow Auto Start instructions.

I changed phones

Contact your lender to: 1) Remove old device, 2) Get new activation code, 3) Set up app on new phone.

The app crashed

It restarts automatically. If persistent: restart device, check for updates from lender, or request replacement APK.

Contact

Technical: support@paylock.pro

Payment issues: Contact your lender directly

Include: your name, lender name, device model, problem description.
