8. FAQ & Troubleshooting

1. Introduction

The PayLock Pro Client app is installed on your device as part of a loan agreement with your lender. The app enables your lender to:

- Send you payment reminders and notifications
- Display payment information and loan status
- Manage device access based on your payment status
- Track device location for compliance purposes

Note: The app requires certain permissions to function. These permissions are part of your loan agreement.

2. Installation & Setup

Your lender will provide you with the app in one of these ways:

- Direct APK download link
 - QR code scan (zero-touch setup)
 - NFC tap enrollment
1. Install the app on your Android device.
 2. Open the app and enter the activation code provided by your lender.
 3. Follow the on-screen instructions to grant required permissions.
 4. Once setup is complete, the app will run in the background.

3. Granting Permissions

The app requires the following permissions for proper operation:

Required Permissions

- Battery Optimization: Ensures the app stays active in the background.
- Display Over Other Apps (Overlay): Shows payment reminders and lock screens.
- Auto-Start: Allows the app to restart after device reboot.
- Accessibility Service: Enables device administration features.
- Location: Tracks device location for compliance monitoring.
- Notifications: Receives payment reminders and alerts.
- Usage Stats: Monitors app usage for security.
- Notification Listener: Ensures critical alerts are not dismissed.

Note: Once all permissions are granted and your lender has disabled uninstall, these permissions cannot be changed. Attempting to revoke permissions may trigger a security response including data wipe.

4. Understanding the Home Screen

The home screen shows your current status:

- Protection Status: Green = all permissions active, Yellow = some missing
- Device Status: Shows if your device is locked or unlocked
- Payment Status: Next payment due date and amount
- Lender Contact: Quick access to contact your lender

5. Payment Information

You will receive notifications before each payment due date. The app displays:

- Total loan amount and remaining balance
- Next payment date and amount due
- Payment history and receipts
- Late fees (if applicable)

Make payments directly to your lender using the methods they specify. Once your lender records the payment, your status updates automatically.

6. Device Lock & Notifications

If a payment is overdue past the grace period, your lender may lock your device. When locked:

- A lock screen message from your lender will be displayed.
- You can still make emergency calls (112/911).
- The device unlocks automatically when your lender confirms payment.
- Temporary unlocks may be granted by your lender.

7. Contacting Your Lender

Use the in-app messaging feature or contact your lender directly:

- In-app chat (if available on your plan)
- Phone number displayed on the lock screen
- Email provided in your loan agreement

8. FAQ & Troubleshooting

Can I uninstall the app?

The app can only be uninstalled with your lender's permission. Contact your lender to discuss uninstallation after your loan is fully repaid.

My device is locked but I made a payment

Contact your lender to confirm payment receipt. Once confirmed, your device will be unlocked within minutes.

The app is draining my battery

The app is optimized for minimal battery usage. If you experience issues, ensure battery optimization is enabled in your device settings.

I'm not receiving notifications

Check that notification permissions are granted and that the app is not being killed by your device's battery saver. Contact your lender if issues persist.
