Table of Contents

- 1. Accessing the Portal
- 2. Dashboard
- 3. Client Management
- 4. Loan Management
- 5. Payment Processing
- 6. Device Management
- 7. Reports & Exports
- 8. Settings & Administration
- 9. API Access

1. Accessing the Portal

The PayLock Pro Web Portal is accessible at:

<https://api.paylock.pro/api/portal>

1. Open the URL in any modern web browser (Chrome, Firefox, Safari, Edge).
2. Enter your admin username and password.
3. Click 'Login' to access the dashboard.

Note: The web portal provides the same features as the mobile admin app. Use either platform interchangeably - all data is synchronized in real-time.

2. Dashboard

The web dashboard provides a comprehensive overview of your loan portfolio:

- Total clients, active loans, and overdue accounts
- Monthly revenue and collection rate charts
- Recent activity feed showing latest payments and actions
- Quick action buttons for common tasks
- Device status summary (online, offline, locked)

3. Client Management

Adding Clients

Click 'Add Client' from the sidebar or dashboard. Fill in the client form with name, contact details, and optional device information.

Client Search & Filters

Use the search bar to find clients by name, phone, or email. Apply filters for payment status, device status, or loan amount.

Client Profile

Click any client to view their complete profile. From here you can:

- View and edit contact information
- Create new loans or modify existing ones
- Record payments and view payment history
- Lock/unlock their device remotely
- Upload documents to their vault
- View GPS location history
- Send messages via chat, Telegram, or WhatsApp

4. Loan Management

Create and manage loans from client profiles or the Loans section.

Creating a Loan

1. Navigate to a client's profile.
2. Click 'Create Loan'.
3. Select a pre-configured loan plan or enter custom terms.
4. Set the principal, interest rate, duration, and payment frequency.
5. Review the auto-generated payment schedule.
6. Click 'Create' to finalize.

Loan Status

Loans have the following statuses:

- Active: Loan is current with payments
- Overdue: One or more payments are past due
- Defaulted: Multiple missed payments past threshold
- Completed: Loan is fully repaid
- Restructured: Terms have been modified

5. Payment Processing

Record payments from the Payments section or within a client's loan view.

- Supports multiple payment methods: cash, bank transfer, Stripe, mobile money
- Automatic late fee calculation based on configurable rules
- Payment receipts generated automatically
- Bulk payment recording via CSV import (Enterprise)

6. Device Management

Manage client devices from the Device Management section.

Lock/Unlock

Select a client and choose Lock or Unlock. Add a custom message that displays on the client's device lock screen.

Auto-Lock Rules

Configure automatic locking based on payment status. Set grace periods and escalation rules.

Device Modes

- Device Admin: Standard mode with lock/unlock and notification capabilities
- Device Owner: Full control including app whitelisting, kiosk mode, and factory reset protection (Enterprise)

7. Reports & Exports

Generate reports from the Reports section.

- Financial Summary: Revenue, expenses, profit/loss
- Collection Trends: Payment rates over time
- Client Analytics: Health scores, risk distribution
- Portfolio Health: NPA ratios, risk scoring (Enterprise)
- Revenue Forecast: Predicted future collections (Enterprise)
- Export as PDF or CSV for offline analysis
- Schedule automated email reports (Enterprise)

8. Settings & Administration

User Management

Manage team members and their access levels:

- Super Admin: Full access to all features, can create admins and users
- Admin: Can create users, manage user plans, access most features
- User: Limited access based on assigned role (viewer, collections)

Plan Management

Super Admins and Admins can change subscription plans for their team members directly from the user management section.

Session Management

Monitor active sessions and revoke unauthorized access. Each session shows login time, IP address, and device information.

9. API Access (Enterprise)

Enterprise customers have full REST API access for custom integrations.

- API base URL: <https://api.paylock.pro/api/>
- Authentication: Token-based (obtained via [/api/admin/login](#))
- Full CRUD operations for clients, loans, and payments
- Webhook support for real-time event notifications
- Rate limit: 1000 requests/minute

API documentation available at: <https://api.paylock.pro/api/docs>
